Dr. Eugene Elliott is a California board-certified plastic surgeon extensively trained and experienced in numerous cosmetic surgery procedures.

Surgical procedures such as breast implants, tummy tucks, liposuctions and face lifts are performed. Other services include facial cosmetic surgery, body contouring, breast surgery, male cosmetic surgery, cosmetic skin enhancement and laser hair reduction.

Among the cosmetic procedures offered are rhinoplasty, facial enhancement, blepharoplasty, face and neck lifts, liposuction, abdominoplasty, body contouring, and breast lift, augmentation or reduction.

Laser hair removal, laser resurfacing, Botox injections and professional aesthetician skin care are available to help create a more youthful appearance.

One of the treatments used to improve skin quality is the IPL laser treatment, a non-surgical procedure with no downtime for the patient. The treatment is used to diminish signs of aging, unwanted pigmentation and damage caused by the sun.
